Ex. No.:5	AUTOMATED LEGAL DOCUMENT ANALYZER USING GPT-4	URK23CS1167
09.10.2026		

Aim:

To develop an automated legal document analyzer using GPT-4 that summarizes legal documents and extracts important information such as parties, key clauses, obligations, payment terms, termination conditions and important dates.

Problem Statement:

Design and develop an automated legal document analyzer using GPT-4. The application should accept legal contracts or legal text, analyze the content, generate a concise summary, identify important clauses and obligations, extract relevant information and present the results in a structured format.

Software Requirements:

Software	Version
Python	3.13.5
Ollama	0.40.13
VS Code	1.144.0
Pandas	3.1.0
Sentence Transformers	6.2.0
Flask	3.1.3
LLM Model	Llama 3.2 (3B) via Ollama

Input Parameters:

Parameter	Description
Legal Document	Contract or legal text – uploaded .txt/.pdf/.docx file or pasted text. Example: employment_agreement.txt
Document Type	Auto-detect, Employment, NDA, Rental, Service, Sales, Loan or Other
Parties	Parties mentioned in the document (extracted automatically)
Document Length	Number of characters, words and approximate pages (calculated automatically)
Analysis Type	Complete, Summary, Clauses or Obligations
Output Format	Structured text report with headings and bullet points

System Architecture:

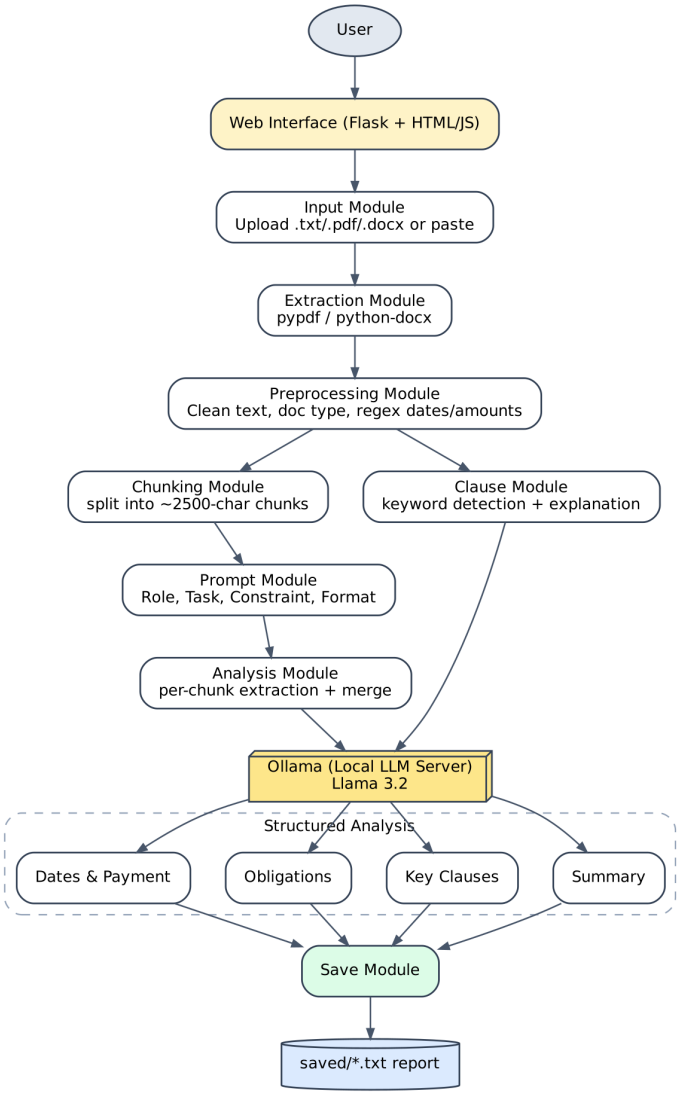

Fig. 5.1 System architecture

Module Design:

Module	Responsibility
Input Module	Accepts legal documents through file upload (.txt, .pdf, .docx), sample selection or manual text entry.
Extraction Module	Reads the uploaded document and extracts its text using pypdf and python-docx.
Preprocessing Module	Cleans the text, detects the document type and finds dates, amounts and durations using regular expressions.
Chunking Module	Splits long documents into chunks of about 2500 characters at paragraph boundaries.
Prompt Module	Creates a structured prompt with Role, Task, Information to extract, Constraint ('do not invent facts') and JSON Output Format.

Module	Responsibility
Analysis Module	Sends each chunk to the LLM, merges the extracted parties, obligations, payment, termination and dates, and generates an abstractive summary.
Clause Module	Identifies key clauses (confidentiality, payment, termination, liability, IP, dispute resolution) and explains each in simple words with importance.
Save Module	Saves the complete structured analysis report as a .txt file.

Implementation:

• GitHub Link - https://github.com/MONICK10/GPT4-Exp5-Legal-Document-Analyzer
• LinkedIn Post Link - <add LinkedIn post link in config.json>
• Run: `python app.py` → `http://localhost:5005`

Output Screenshots:

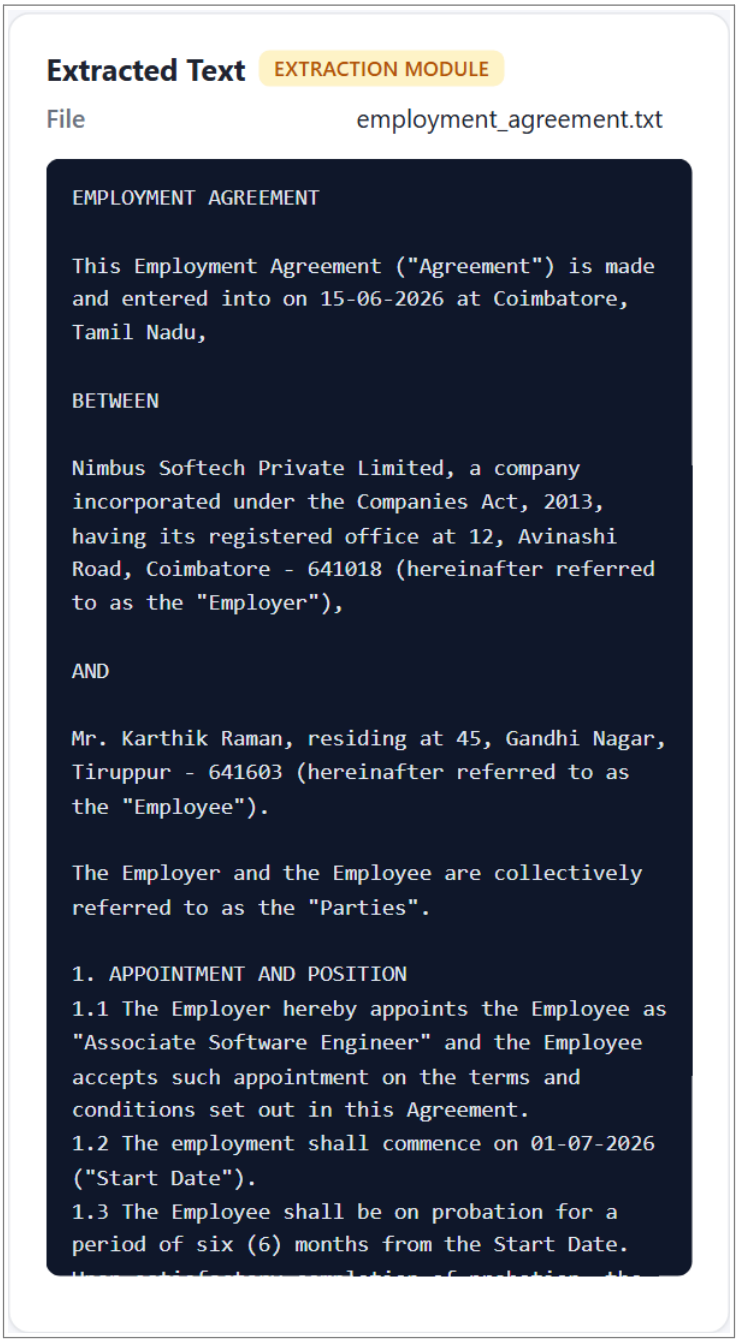

Fig. 5.4 Extracted Text

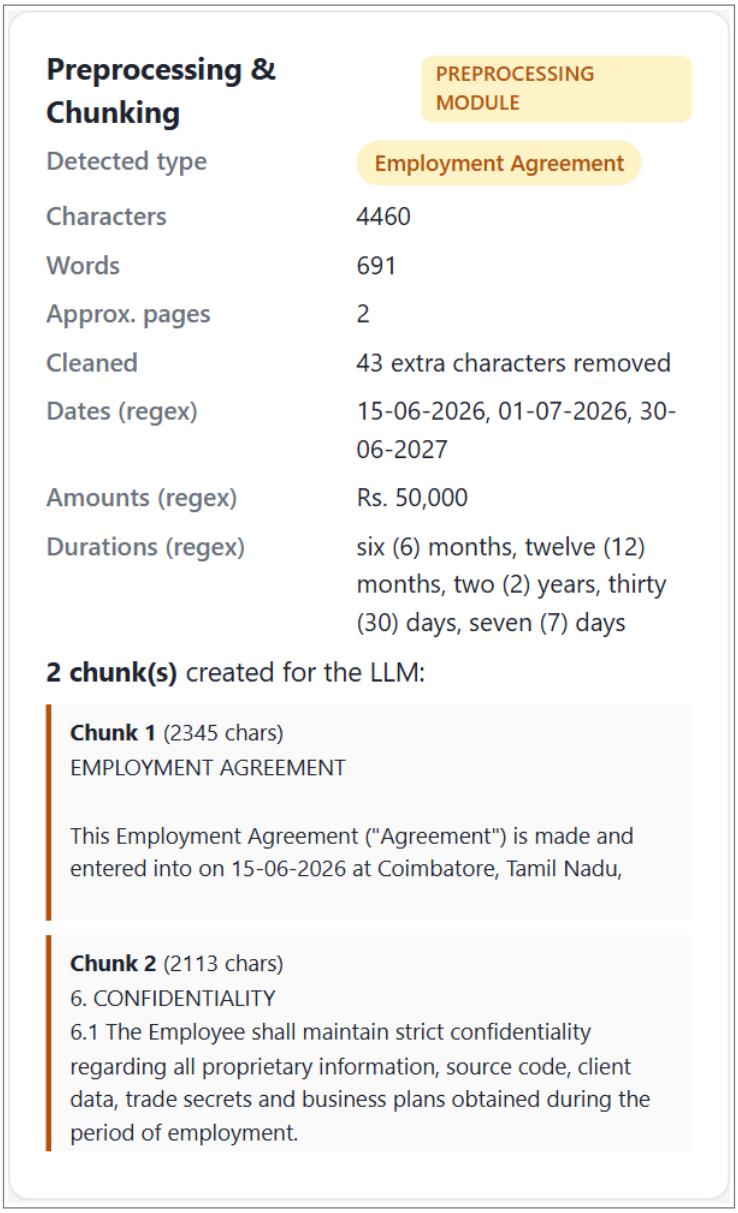

Fig. 5.5 Preprocessing And Chunking

Prompt Generation PROMPT MODULE

Prompt sent for chunk 1 (each chunk gets the same structure).

```
ROLE: You are a legal document analysis assistant.
TASK: Read part 1 of 2 of a Employment Agreement and extract key information.
CONSTRAINT: Use ONLY information present in this text. Do not invent facts. Use [] or "" if not present.
RULES:
- important_dates: include every calendar date that is PRINTED in the text (such as 01-07-2026), copied exactly, with
what happens on it. Never calculate, guess or infer a date that is not printed - a probation or renewal date you worked
out yourself must NOT be listed. A notice period such as "30 days" is NOT a date: put it in termination, not here.
- governing_law: the law or country the contract is governed by, for example "the laws of India". Look for the words
"governed by".
- parties: give the actual names only, not role words like "Employee" on their own.
- obligations: attribute each duty to the party named as the DOER of that sentence, never to the other side. Check the
subject of the sentence before you answer:
    "the Employee shall devote full working time" -> the Employee's duty.
    "the Employee hereby assigns to the Employer all rights in intellectual property" -> the Employee's duty (the
Employee gives, the Employer receives).
    "the Employer shall pay a gross salary" -> the Employer's duty.
  Inside the obligation text keep the role words exactly as the document writes them ("to the Employer", "by the
Employee"). Never swap them round and never replace a role word with a person's or company's name.
  Do not list the same duty twice.
OUTPUT FORMAT: JSON with keys:
{"parties": ["..."], "purpose": "", "duration": "", "payment_terms": ["..."], "obligations": [{"party": "...",
"obligation": "..."}], "termination": ["..."], "confidentiality": "", "governing_law": "", "important_dates": [{"date":
"...", "event": "..."}]}

TEXT:
EMPLOYMENT AGREEMENT

This Employment Agreement ("Agreement") is made and entered into on 15-06-2026 at Coimbatore, Tamil Nadu,

BETWEEN

Nimbus Softech Private Limited, a company incorporated under the Companies Act, 2013, having its registered office at
```

Fig. 5.6 Prompt Generation

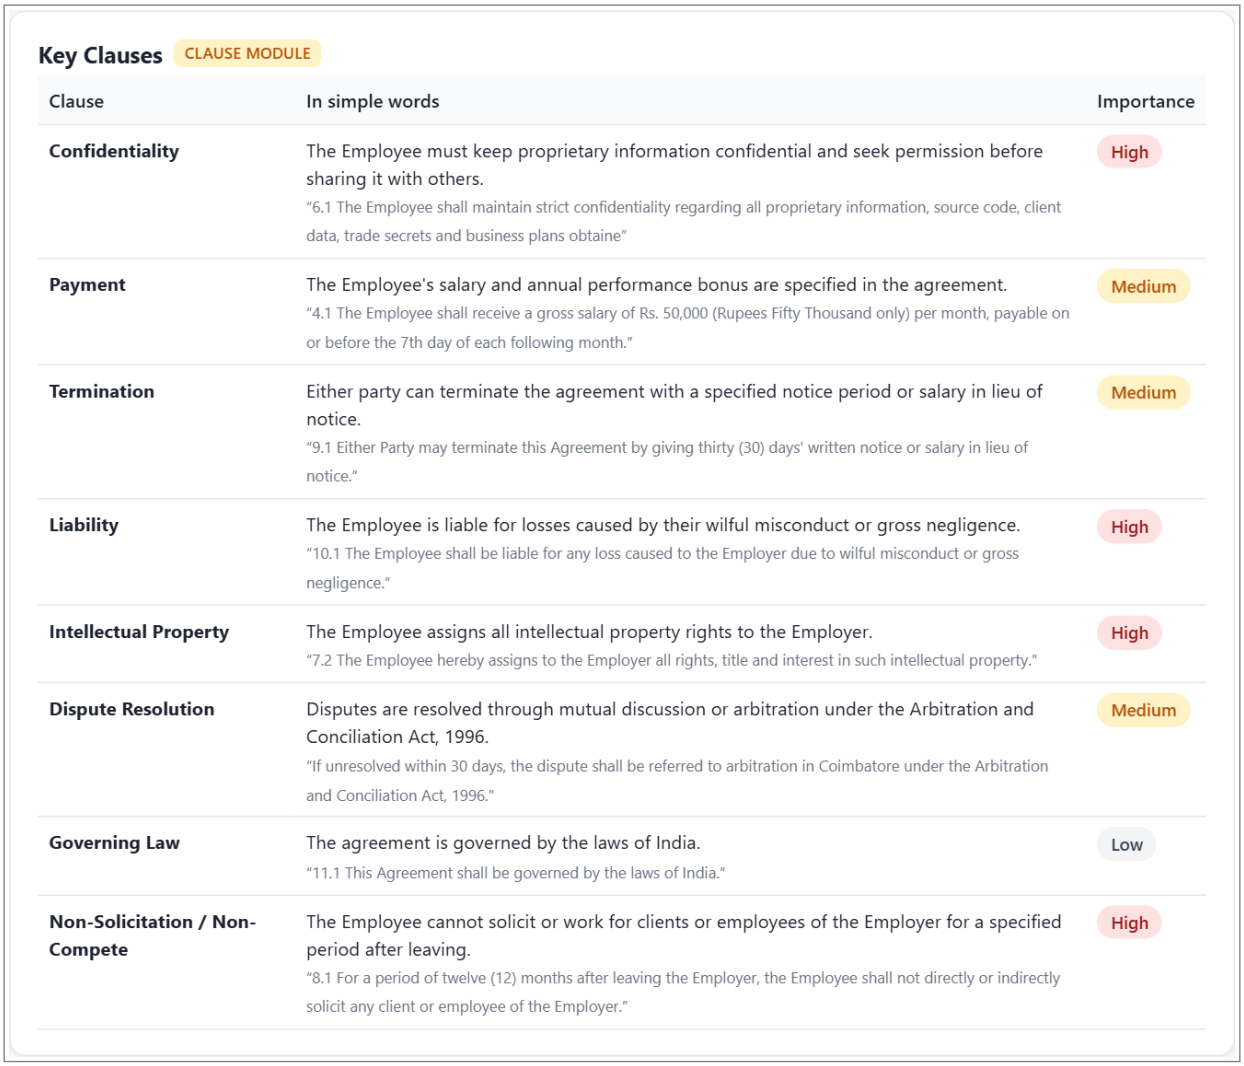

Document Summary SUMMARY MODULE

This Employment Agreement is between Nimbus Softech Private Limited and Mr. Karthik Raman, outlining the terms of Mr. Karthik Raman's employment with the company. The agreement will last for 12 months, starting from July 1, 2026, and can be terminated by either party with 30 days' written notice or by paying the employee's salary in lieu of notice. During this period, Mr. Karthik Raman will perform various duties, including software development and client support, and will maintain confidentiality regarding the company's proprietary information. Upon termination, Mr. Karthik Raman will return all company property and may be liable for any loss caused to the company due to his actions. The agreement is governed by the laws of India and will expire on June 30, 2027.

Points to check before signing:

- The agreement can be terminated by either party with 30 days' written notice or by paying the employee's salary in lieu of notice.
- Mr. Karthik Raman is required to return all company property upon termination.
- The agreement may be terminated early if Mr. Karthik Raman engages in misconduct, fraud, or wilful negligence.

Fig. 5.7 Document Summary

Result:

Thus, an automated legal document analyzer using GPT-4 was successfully developed. The system accepts legal documents, processes the text, generates a concise summary, identifies important clauses and obligations, extracts relevant information and produces a structured analysis.
